

# Effect of smoking on FEV

*Amy Willis*

*11/29/2019*

## 1 Introduction

Here is where I would introduce the study and provide motivation, etc.

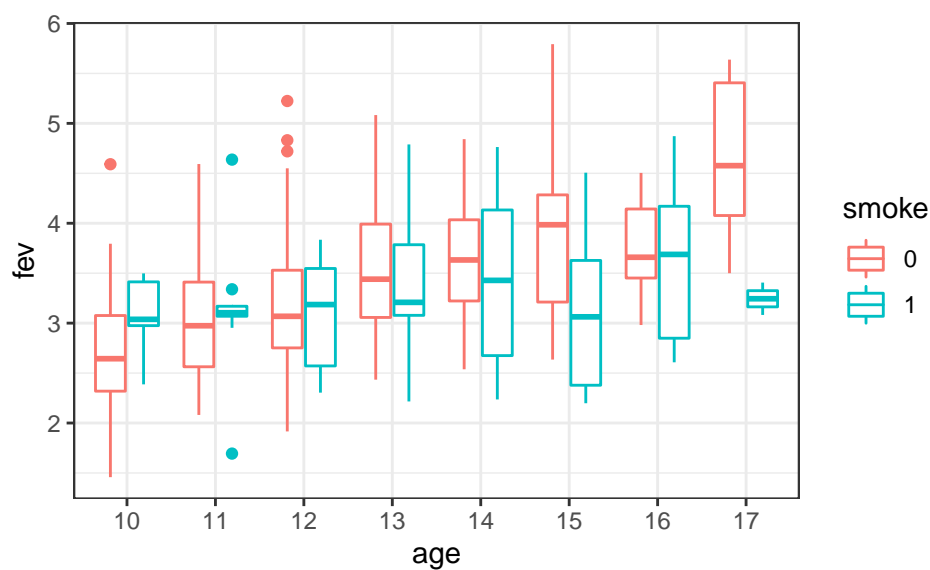

### 1.1 Summary statistics

Here are some summary statistics for the older participants in the FEV study:

Age (years)	Sex	Smoker	Sample size	Mean FEV (L)
17	Female	No	1	<b>3.50</b>
17	Male	No	5	<b>4.88</b>
17	Male	Yes	2	<b>3.24</b>
18	Female	No	3	<b>2.95</b>
18	Male	No	1	<b>4.22</b>
18	Male	Yes	2	<b>4.25</b>
19	Female	Yes	2	<b>3.43</b>
19	Male	No	1	<b>5.10</b>

## 2 Data analysis

Here is a plot:

Notice how there is no code shown in the pdf version of this document... but you can see it in the Rmd file. That was done by setting `echo=FALSE` in the code chunks that created the table and the figure.
